EN 420+A1:2009 EN 388:2003

PPE CATEGORY II

Read the instructions carefully.

In accordance with the requirements of the Regulation (EU) 2016/425.

Product: Five-fingered gloves made from polyester seamless knitted fabric, palm and fingers coated with microporous nitrile (nitrile foam).

Design:	"ABRAK"	Code:	3410 001 109 XX	Size:	6, 7, 8, 9, 10	Production pattern:	10208010	
Material:	100% Polyester palm and fingers coated with Nitrile foam.							

Purpose: The basic function of the gloves is protection against injuries that may occur in working areas for which the product is designed. They may serve as a protection of hands against dirt and protection in the working areas where workers have to face mechanical hazards.

The glove	The gloves were tested in accordance with EN 388 - mechanical hazards (The higher the number, the higher the protection factor)						
A (0-4)	Abrasion resistance	Performance level 4			The protection works only against the specified		
B (0-5)	Blade cut resistance (coupe test)	Performance level	1	(<u></u>	hazards. Do not use the gloves as a protection		
C (0-4) Tear resistance		Performance level	2	\sim	against different hazards and classes. The results apply only for the model classes, not for		
D (0-4)	Puncture resistance	Performance level	1	A.B.C.D	the protection levels (classes). The protection		
EN 420 -	protective gloves (general requireme	levels (classes) are determined based on the					
(1-5)	Dexterity	tests carried out in accordance with the conditions determined in the valid standards					
$,,X^{\prime\prime}=tex$	st not performed or not applicable	specified above. The protection levels (classes) apply only for new gloves not washed or					
		cleaned.					

Please note: The user must check the gloves before and after use to verify that they are in the required condition. Do not use as a protection against different hazards and classes. Do not use the gloves for handling with sharp objects, flames or hot or heated objects, toxic chemicals or greasy objects. Not resistant to soaking. It is not allowed to wear these gloves in cases with risk of entanglement with moving parts of machines.

The gloves comply with the requirements for puncture resistance. However, they are not meant for protection against thin, sharp objects, such as injection needles. The mentioned facts may help the user for rational use of this type of protective gloves. It is the responsibility of every user to judge, whether the gloves are used in suitable conditions.

Maintenance, lifetime: After use, make sure the gloves are removed from all pollutants. To prolong the life of the glove. The gloves are designed for single or short-term use only. Damp gloves should be dried out at a room temperature. Gloves should not be washed. Any dirt should be brushed out using a soft brush, nitrile Wipe with a damp cloth. Do not clean chemically, bleach, dry in a tumble dryer, or iron. The gloves that are worn through, have holes burned through, or are hard must be replaced. We are not responsible for possible reduction of the protective function caused by improper maintenance. Under suitable storage conditions, shelf life is 2 years.

Storing and transport: Storing in a clean, dry and ventilated place at the room temperature, without any contamination by moisture, dirt, mould, or other agents reducing the level of protection. Do not expose it to solar radiation. The supplier doesn't provide warranty for such damage. Carry them preferably in original package.

Accessories: The product is supplied without accessories.

Dangerous admixtures: The gloves contain allergen - Latex. They may cause an allergic reaction if used by sensitive people, including anaphylactic shock. If skin irritation or allergic reaction do not use gloves and contact your doctor immediately.

Disposal: used gloves can be contaminated with infectious materials or other dangerous substances - dispose of them in compliance with the Act on Waste.
