Materiál manžety: polyamid (nylon), Pletený, dyneema

VLASTNOSTI

Typ manžety: knitwrist
Oblasť máčania: Dľaň, Prsty
Mierka: 13 GG

TECHNOLÓGIA

DYNEEMA

Dyneema® is a super-strong fiber, it is made from Ultra High Molecular Weight Polyethylene (UHMWPE) and offers maximum strength with minimum weight. This makes the number of possible applications virtually unlimited.

Fibers, yarns, and finished textile products must be tested for harmful substances and come from environmentally friendly production sites in order to bear the OEKO-TEX® seal.

The registered trademark is simultaneously a Quality Seal. Only articles that have undergone comprehensive testing may bear the label.
