POPIS

Safety low shoe in a modern gray-yellow color combination. The upper of the shoe is made of nubuck leather and perforated along the entire length. The oil-resistant non-slip outsole is made of double-density polyurethane and ensures maximum safety at every step. The shoes are equipped with a comfortable, perforated inner insole, which guarantees comfort and air circulation inside the shoe. The absorption of energy in the heel area absorbs shocks and reduces the feeling of fatigue in the feet. Thanks to the safety composite toe cap, the footwear meets the requirements of the EN ISO 20345: 2011 standard. This means that the feet are protected against compression with a force of up to 15 kN or the fall of a load of up to 20 kg from a height of 1 m. The feet are also protected from below, thanks to the antipuncture composite midsole. The shoes do not contain metal components and are equipped with the ESD function. Therefore, it is an ideal model for indoor spaces and sensitive environments, where it is necessary to prevent sparks from electrostatic discharge or for rooms equipped with a safety frame. Thanks to the minimalist design, this model will go great with most Cerva workwear collections.
