POPIS

An anatomically shaped insole for maximum hygiene and comfort in your footwear not only at work. The Workers insole contains an ultra fresh component with a charcoal content of 5%, thus preventing the formation of unpleasant smell, making your feet fresh throughout the day. The insole may be suitable especially for work and protective footwear as it is antistatic and thus helps protect against electric discharge. Shock absorption and comfort provided by double density technology and additional PU foam. The Climacool membrane fabric brings breathability and excellent sweat absorption.
