Model: 1170 005 800 00 (1109-00) bib style apron - black
1170 005 100 00 (1110-00) bib style apron - white
1170 005 500 00 (1111-00) bib style apron – green

Material: These products are made from polyester fabric (serving as a backing) coated with flexible PVC.

Purpose: They are designed to protect the section of the body they cover from water, moderate mechanical influences and dirt. They are meant to be used as outer garments worn over regular occupational clothing. The PVC of the waterproof layer is a thermoplastic material which cannot withstand long-term exposure to temperatures over 80 °C or longer exposure to freezing temperatures. The practical use of the aprons must conform to these conditions.

Size: Universal

Storage and maintenance: Products should be stored in dry and clean spaces at temperatures between 5 °C and 40 °C. Direct sunlight can have adverse effects on the products' service life. Keep the aprons clean after use. Remnants of sand, construction materials etc. can contribute to accelerated mechanical damage. The products can be hand-washed in water under 30 °C with the use of regular washing detergents and dried by hanging freely in moderate temperatures. The products must not be bleached, ironed, dry-cleaned or tumble-dried.

Packaging: in sealed transparent PE covers

Disposal: as solid domestic waste.
